Investment Objective

ANRF seeks to create a diversified portfolio of investments which will generate absolute returns in excess of the S&P ASX 300 Resources Index, after all fees and expenses.

Why Argonaut Natural Resources Fund?

Global trends indicate that the demand and supply characteristics of many key commodities will undergo significant shifts over the next decade. Investors seeking to gain exposure to these attractive opportunities may have difficulty navigating the complex and confusing universe of the resources sector.

- An investment in ANRF should be seen as an opportunity to gain exposure to an actively managed portfolio of good value and high-quality resource companies and energy projects.
- Investors should view the investment on a five-to-ten-year investment horizon, as the timing of the cycle in commodities and critical mineral equities are not possible to predict.
- The Fund’s investment mandate has been structured to capitalise on what we believe to be the beginning of a multi-year upgrade cycle in commodities and critical mineral equities.
- With Argonaut’s strong financial, technical and commercial expertise, we believe ANRF is well-positioned to identify and capitalize on this compelling investment opportunity.
